

AviComp Controls GmbH is a medium-sized engineering company from Leipzig with further locations in Europe and Asia. Thanks to the experience gained from more than 1,500 completed projects in various industries and due to extensive certifications, the company is one of the leading providers for control and automation technology as well as in the field of digitization.

To strengthen our team and to address our diverse tasks we are seeking you as

Software Engineer (m/f/d)

The tasks include in particular:

- engineering of I&C technology on the basis of extensive customer specifications
- extensive programming of PLC controls
- support during the test phase of the I&C system in the test centre
- fault and error analyses
- carrying out commissioning
- creation of documentation

We offer:

- an interesting area of responsibility
- an international team and strong team spirit
- wide range of training courses and a very good induction plan
- flexible working hours and home office
- height-adjustable work station
- JobTicket with a subsidy of EUR 50.00 per month or a fuel card
- company pension scheme with an AG share of 120% or 127,00 EUR
- JobRad
- corporate sports and corporate events

Interested in joining our team? We are looking forward to receiving your complete application.
